Junior Developer

Second-year Bachelor of Information Technology student with a Certificate in Marketing and hands-on experience in software development, UI/UX design, and Agile project management. Passionate about building intuitive digital products by combining technical skills with marketing insight and user empathy. Seeking an internship or junior role in software development, UX/UI design, or IT support.

WORK EXPERIENCE

Side Story Cafe • Sydney

Café Manager

- Managed a team of 10+ staff, overseeing daily operations, scheduling, and inventory.
- Streamlined workflows, reducing service delays by 20%.
- Facilitated staff training, conflict resolution, and customer satisfaction.

Barista

- Delivered exceptional service in a high-volume café setting.
- Collaborated with back-of-house teams to support efficient service execution.

EDUCATION

Certificate in Marketing

Greenwich Management School • 01/2023

- Covered digital marketing, branding, consumer psychology, and positioning.
- Applied marketing insights to UX design and persona-driven development.

Bachelor of Information Technology

Academy of Information Technology (AIT) • Sydney

Coursework in software engineering, UI/UX design, Agile/Scrum methodology, and systems architecture.

PROJECTS

Grocery Shopping App — Android (Java)

- Designed and built an Android app with local SQLite data storage for price comparison and list management.
- Applied UX concepts including wireframes, user personas, and journey maps for better usability.

Library Management System — Desktop (C#)

- Developed a Windows Forms application to manage books, memberships, and check-ins using SQL Server.
- Integrated user-focused design, drawing on empathy mapping and persona research.
